Paul Ragueneau

Full-Stack Web Developer · AI Assisted Development

● Work-study apprentice at Ceva Santé Animale · until September 2027

pr.

PROFILE

Full-stack web developer building business applications end to end, from the interface to the APIs. What sets me apart: using AI tools (Cursor, Claude Code) to ship faster without compromising on quality or security (SonarQube, OWASP Top 10).

EXPERIENCE

Full Stack Developer – AI Assisted Development

Ceva Santé Animale — Mar 2026 – present

Internship (Mar – Aug 2026), then work-study apprenticeship until September 2027

- Designed and built business applications end to end with React, Next.js, TypeScript and Tailwind CSS, using an AI-assisted development workflow.
- Migrated existing applications to modern, open-source technologies.
- Gathered requirements from business teams and iterated in short cycles with stakeholders.
- Ensured code quality and security (SonarQube, OWASP Top 10) and tracked metrics to build the business case for AI-assisted development.

Frontend Developer

H2V Solutions — Oct 2024 – Jul 2025

- Designed and built the frontend of a newsletter composition application with React and TypeScript.
- Reusable components within a modular architecture; clean code, strict typing, separation of concerns.

Backend Developer

METAPOLIS — Jul 2023 – Dec 2023

- Backend of a monitoring application with Python and FastAPI, backed by PostgreSQL and MongoDB.
- Fast, well-documented REST APIs (OpenAPI / Swagger), tested and validated; agile methodology.

PROJECTS

NotchBar

macOS app that turns the Mac's notch into a progress bar for the current calendar event.

Swift · SwiftUI · EventKit · AppKit

Petfriendly Locator

Community web app for pet-friendly places around Bordeaux: interactive map, reviews, moderation, CI/CD.

Next.js · TypeScript · Prisma · PostgreSQL · Mapbox · Auth.js · Docker
